

Essential Health

FOR ANIMALS

Cooling Relief (pain blend)

Ingredients: *Black Pepper, Marjoram, sweet; Organic Rosemary ct. 1,8 cineole, Peppermint, Organic Helichrysum, Organic Ginger Root, Cypress, Organic Sesame Seed, and Fractionated Coconut*

This blend is formulated to support pain relief and healing from bumps, bruises, strains, sprains, over-worked muscles, and other physical situations that result in acute pain and inflammation. These are conditions that usually respond well to ice packs or cold compresses.

By using the Cooling Relief Blend as soon as possible, you can help prevent tissue damage caused by swelling and prolonged inflammation, thereby supporting the animal's body in healing faster and without as much chronic discomfort in the future.

Animal Safety Guidelines

- Do not give Essential Oils to your animals internally.
- Animals will often lick the area where Essential Oils have been applied. This is normally not a problem when following recommended dilution and dosage guidelines, but you should watch for adverse reactions that may include skin irritation, vomiting, diarrhea, depression, lethargy, weakness, excessive drooling/salivation, or seizures. If they show signs, wipe the area with a cloth soaked with a carrier oil. If irritation continues or your animal's condition worsens, seek immediate veterinary assistance.
- Never apply Essential Oils directly to an animal's muzzle area, inside nostrils, inside ears or mouth, or directly to genital areas.
- Do not get Essential Oils near or in the eyes. If Essential Oils accidentally get into the eyes, apply a carrier oil such as Grape Seed to a cloth and wipe over the area.
- Do not apply Essential Oils neat (undiluted) to animals; they should always be diluted for topical application to animals.
- In a barn or kennel-type facility, it is best to store aromatherapy products in aroma-safe containers, locked away from children and animals. Be mindful of your fellow barn/stable/kennel mates and their animal friends; not everyone can tolerate the same aromas you and your animals may enjoy.
- Remember, less is best when it comes to Essential Oils. Do not be tempted to think that if it's good, more is better.
- Exercise caution with pregnant animals and use smaller dosages than you normally would. Avoid during first few weeks of pregnancy and do not use on puppies until after 10 weeks of age.

Do Not Use Essential Oils With The Following:

- **Cats:** due to their highly sensitive metabolic systems.
- **Fish and Reptiles:** due to their pH levels and aquatic environment.
- **Birds:** due to their respiratory and metabolic systems.
- **Rodents & small mammals (gerbils, hamsters, rabbits, rats etc.):** there is not enough research on the use of Essential Oils with these animals to determine a safe use.

Alexandria Brighton Collection

ESSENTIAL OILS

Suggested Usage

Massage: Gently massage over the area of concern following the recommended dosage for species and size.

If there is swelling, you can apply an ice pack, making sure to place a thin towel between the ice pack and your animal's skin to prevent skin damage from too much cold.

Dilution & Dosage Guidelines

Always use Essential Oils diluted to .5% to 5% for topical use on animals according to the size, age and physical condition of your animal.

- Babies & Elderly - 0.5%:** 1 drop in 10ml carrier (3 drops per 1oz)
- Miniature (Up to 10 lbs) - 1%:** 2 drops in 10ml carrier (6 drops per 1oz)
- Small (11-25 lbs): - 2%:** 4 drops in 10ml carrier (12 drops per 1oz)
- Medium (26-40 lbs) - 3%:** 6 drops in 10ml carrier (18 drops per 1oz)
- Large (41-70 lbs) - 4%:** 8 drops in 10ml carrier (24 drops per 1oz)
- Extra-Large (70+ lbs) - 5%:** 10 drops in 10ml carrier (30 drops per 1oz)

For topical application, use the diluted product adhering to the dosage recommendations below. Check individual product datasheets for specific precautions, contraindications, or recommendations regarding pregnant, very young, or very elderly animals. Animals should respond within 1 to 3 days but can show improvement immediately. If there is no improvement in 7 days, discontinue use and re-evaluate.

Massage Dosage Guidelines for Dogs

- Miniature (Up to 10 lbs):** 1 to 2 drops massage blend
- Small (11-25 lbs):** 3 to 5 drops massage blend
- Medium (26-40 lbs):** 6 to 9 drops massage blend
- Large (41-70 lbs):** 10 to 15 drops massage blend
- Extra-Large (70+ lbs):** 16 to 20 drops massage blend

Horses and Large Animals

Follow instructions for medium to extra-large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

Smaller Animals

Miniature horses and cows, goats, sheep, etc.

Follow instructions for small to large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

QUALITY STANDARDS

All ingredients in goDésana products are 100% pure and therapeutic, meaning they are sourced and approved by Master Formulator Alexandria Brighton to the highest standards possible. Our raw plant ingredients are chosen for their integrity (all chemical constituents important for use are intact), ecological 'soundness' (all are organic or wildcrafted), and the specific therapeutic chemical constituent percentages that Alexandria Brighton insists upon for safety and therapeutic properties.
