product summary

The prostate, a walnut-sized gland present only in men, is located deep in the pelvis. It's tiny at birth and throughout childhood, but enlarges after puberty, stimulated by rising testosterone levels. Although small compared to other organs, the prostate looms large as a potential source of disease once a man passes middle age.*

Prostate Protect is specifically formulated with essential oils known to have anti-inflammatory and relaxing properties.*

Research has shown that muscle relaxation is vital in relieving a prostate that is chronically inflamed due to hormone imbalance.*

Aromatherapy, combined with herbs and nutrition, can be very beneficial in assisting with prostatitis (inflammation of the prostate).*

ingredient highlights

German Chamomile is one of the most ancient and versatile medicinal herbs known to mankind, with high levels of disease-fighting antioxidants like terpenoids and flavonoids. Sometimes called "herbal aspirin", German Chamomile has strong anti-inflammatory and pain-relieving properties.*

Lavender Spike is unique among Lavenders in that it contains cineole, which increases its medicinal value. It can stimulate circulation while decongesting muscles and soothing discomfort.*

suggested use

- Apply to the area near the prostate, under the scrotum, twice daily. Prostate Protect may be applied neat (undiluted), and can be safely used on a long-term basis.*
