- Keep out of reach of children and pets.
- If you are pregnant, nursing, or under a doctor's care, consult your healthcare provider prior to use.

## product summary

Soothe is a proprietary blend of Essential Oils that have been shown to assist and help support the body with topical reactions that cause itching.\*

Itching, the irritating sensation that makes you want to scratch your skin, can be a symptom of many health conditions. Some common causes of itching include allergic reactions to food, insect bites, pollen, and medicines.\*

Skin conditions like eczema, psoriasis, and dry skin, as well as irritating chemicals, cosmetics, and other substances that come into contact with the skin can trigger itching too. Itching may also be caused by parasites like pinworms, scabies, or head and body lice, and certain diseases that affect the nervous system, like diabetes and shingles.\*

"Allergic contact dermatitis" is the medical term used for a rash or irritation of the skin that occurs when allergens, substances that the immune system reacts to as foreign, touch your skin. Your immune system thinks it's under attack; it overreacts and sends antibodies to help fight the invader. The result is a red, itchy rash.\*

Scratching, as good as it feels, can make the itch worse and potentially lead to complications including infection.\*

## ingredient highlights

**Niaouli** is gentle and seldom irritates, which makes it suitable for use on children. The capacity of Niaouli to promote the formation of new tissue should not be underestimated, and it should be the first choice when treating abrasions, cuts, and skin blemishes.\*

**Lavender, fine** is a known antimicrobial that can kill airborne pathogens in the sinuses and the respiratory airways. It is analgesic and disinfecting when applied to insect bites or stings, soothes muscle aches, relieves headaches, and stimulates the immune system.\*

**Carrot Seed's** powerful antioxidant polyphenols have been studied for their liver-protective qualities. Carrot Seed oil is also widely used in beauty products for moisturizing skin & hair.\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
