

Essential Health

FOR ANIMALS

Super Calm Trauma (anxiety blend)

Ingredients: Valerian, Organic Vetiver, Petitgrain, Marjoram, sweet; Organic Orange, sweet; Ylang Ylang, Grapefruit, pink; Tangerine, Rosewood, Rose, and Organic Tanacetum Annuum

Unfortunately, trauma frequently happens to animals... from pets to farm animals to animals in the wild. Severe trauma may be experienced through accidents, extensive surgery, life-threatening attack from another animal or human, or some other distressing event. Physical trauma is always accompanied by emotional and energy field trauma.

This blend can help an animal let go of fear it's holding, feel more grounded, and able to move beyond a traumatic event to experience life again. The deep calming abilities of this blend can, over time, help reduce or alleviate obsessive, repetitive habits that may develop after trauma. This very physically relaxing blend can help restore peace and allow the body-mind to accept healing.

Animal Safety Guidelines

- Do not give Essential Oils to your animals internally.
- Animals will often lick the area where Essential Oils have been applied. This is normally not a problem when following recommended dilution and dosage guidelines, but you should watch for adverse reactions that may include skin irritation, vomiting, diarrhea, depression, lethargy, weakness, excessive drooling/salivation, or seizures. If they show signs, wipe the area with a cloth soaked with a carrier oil. If irritation continues or your animal's condition worsens, seek immediate veterinary assistance.
- Never apply Essential Oils directly to an animal's muzzle area, inside nostrils, inside ears or mouth, or directly to genital areas.
- Do not get Essential Oils near or in the eyes. If Essential Oils accidentally get into the eyes, apply a carrier oil such as Grape Seed to a cloth and wipe over the area.
- Do not apply Essential Oils neat (undiluted) to animals; they should always be diluted for topical application to animals.
- In a barn or kennel-type facility, it is best to store aromatherapy products in aroma-safe containers, locked away from children and animals. Be mindful of your fellow barn/stable/kennel mates and their animal friends; not everyone can tolerate the same aromas you and your animals may enjoy.
- Remember, less is best when it comes to Essential Oils. Do not be tempted to think that if it's good, more is better.
- Exercise caution with pregnant animals and use smaller dosages than you normally would. Avoid during first few weeks of pregnancy and do not use on puppies until after 10 weeks of age.

Do Not Use Essential Oils With The Following:

- **Cats:** due to their highly sensitive metabolic systems.
- **Fish and Reptiles:** due to their pH levels and aquatic environment.
- **Birds:** due to their respiratory and metabolic systems.
- **Rodents & small mammals (gerbils, hamsters, rabbits, rats etc.):** there is not enough research on the use of Essential Oils with these animals to determine a safe use.

Alexandria Brighton Collection

ESSENTIAL OILS

Suggested Usage

Bath: Add 6-12 drops undiluted oil blend to 1 ounce all natural shampoo and bathe the animal using caution not to get it into the eyes or ears.

Inhalation: Place 1-2 drops undiluted blend on a cotton ball or small cloth and attached out of reach on the outside of cage or kennel if your animal must be confined. Diffuse 10-15 minutes at 4-6 hour intervals as needed, not to exceed 3-5 days. If longer term usage is necessary, switch to misting.

Massage: Can be massaged over the Heart and Brachial Chakras, following the dosage chart, to provide comfort. It is especially helpful to hold your pet close if they are small enough and their physical condition allows. Left untreated, PTSD in animals makes for a very fearful, frequently angry, and always unhappy animal that can sometimes become a danger to themselves and others.

Misting: Add 5-6 drops of the undiluted blend to 2 ounces of distilled water in a cobalt blue glass or PET plastic spray bottle. Mist around the animal or spray into the environment to create a loving environment and lift the spirits. Very helpful for veterinary offices and rescue centers. Shake well before each use. Do not spray into eyes or mouth.

Dilution & Dosage Guidelines

Always use Essential Oils diluted to .5% to 5% for topical use on animals according to the size, age and physical condition of your animal.

- Babies & Elderly - 0.5%:** 1 drop in 10ml carrier (3 drops per 1oz)
- Miniature (Up to 10 lbs) - 1%:** 2 drops in 10ml carrier (6 drops per 1oz)
- Small (11-25 lbs): - 2%:** 4 drops in 10ml carrier (12 drops per 1oz)
- Medium (26-40 lbs) - 3%:** 6 drops in 10ml carrier (18 drops per 1oz)
- Large (41-70 lbs) - 4%:** 8 drops in 10ml carrier (24 drops per 1oz)
- Extra-Large (70+ lbs) - 5%:** 10 drops in 10ml carrier (30 drops per 1oz)

For topical application, use the diluted product adhering to the dosage recommendations below. Check individual product datasheets for specific precautions, contraindications, or recommendations regarding pregnant, very young, or very elderly animals. Animals should respond within 1 to 3 days but can show improvement immediately. If there is no improvement in 7 days, discontinue use and re-evaluate.

Massage Dosage Guidelines for Dogs

- Miniature (Up to 10 lbs):** 1 to 2 drops massage blend
- Small (11-25 lbs):** 3 to 5 drops massage blend
- Medium (26-40 lbs):** 6 to 9 drops massage blend
- Large (41-70 lbs):** 10 to 15 drops massage blend
- Extra-Large (70+ lbs):** 16 to 20 drops massage blend

Horses and Large Animals

Follow instructions for medium to extra-large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

Smaller Animals

Miniature horses and cows, goats, sheep, etc.

Follow instructions for small to large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

QUALITY STANDARDS

All ingredients in goDésana products are 100% pure and therapeutic, meaning they are sourced and approved by Master Formulator Alexandria Brighton to the highest standards possible. Our raw plant ingredients are chosen for their integrity (all chemical constituents important for use are intact), ecological 'soundness' (all are organic or wildcrafted), and the specific therapeutic chemical constituent percentages that Alexandria Brighton insists upon for safety and therapeutic properties.
