

# Essential Health

## FOR ANIMALS

### Tick Repellent (health blend)

**Ingredients:** *Geranium, rose, Myrrh, Rosewood, Lavender, fine; Organic Sesame Seed, and Fractionated Coconut*

Serious illnesses can be transmitted through tick bites on your pets, and a pet with ticks can be a threat to the health of humans as well. Lyme Disease and Rocky Mountain Spotted Fever are two serious illnesses transmitted to both animals and humans by ticks. These can be very serious, or even fatal, to you and your pet's health.

If you live in an area known to have ticks, or if you are planning to take your pet into an area with the possibility of ticks, be sure to use the Tick Repellent Blend before you head out into nature. When you and your pet come back inside, check yourself and your pet thoroughly to make sure you are both tick-free.

This formula is safe and effective when used as directed. Do not get near the eyes, in the ears, or on genital areas.

### Animal Safety Guidelines

- Do not give Essential Oils to your animals internally.
- Animals will often lick the area where Essential Oils have been applied. This is normally not a problem when following recommended dilution and dosage guidelines, but you should watch for adverse reactions that may include skin irritation, vomiting, diarrhea, depression, lethargy, weakness, excessive drooling/salivation, or seizures. If they show signs, wipe the area with a cloth soaked with a carrier oil. If irritation continues or your animal's condition worsens, seek immediate veterinary assistance.
- Never apply Essential Oils directly to an animal's muzzle area, inside nostrils, inside ears or mouth, or directly to genital areas.
- Do not get Essential Oils near or in the eyes. If Essential Oils accidentally get into the eyes, apply a carrier oil such as Grape Seed to a cloth and wipe over the area.
- Do not apply Essential Oils neat (undiluted) to animals; they should always be diluted for topical application to animals.
- In a barn or kennel-type facility, it is best to store aromatherapy products in aroma-safe containers, locked away from children and animals. Be mindful of your fellow barn/stable/kennel mates and their animal friends; not everyone can tolerate the same aromas you and your animals may enjoy.
- Remember, less is best when it comes to Essential Oils. Do not be tempted to think that if it's good, more is better.
- Exercise caution with pregnant animals and use smaller dosages than you normally would. Avoid during first few weeks of pregnancy and do not use on puppies until after 10 weeks of age.

#### Do Not Use Essential Oils With The Following:

- **Cats:** due to their highly sensitive metabolic systems.
- **Fish and Reptiles:** due to their pH levels and aquatic environment.
- **Birds:** due to their respiratory and metabolic systems.
- **Rodents & small mammals (gerbils, hamsters, rabbits, rats etc.):** there is not enough research on the use of Essential Oils with these animals to determine a safe use.

# Alexandria Brighton Collection

ESSENTIAL OILS

### Suggested Usage

**Bath:** Add 6-12 drops undiluted oil blend to 1 ounce all natural shampoo and bathe the animal, using caution not get it into the eyes or ears.

**Misting:** Combine 5-6 drops with 2 ounces of distilled water in a cobalt blue glass or PET plastic bottle. Shake well before each use. Mist around the area where your pet sleeps, making sure to allow bedding to dry before they use the bed. Be careful to not spray into animal's eyes or mouth.

**Repellent Spray:** You can spray onto the areas and then massage it through the hair. Do not apply too much so that your pet wants to lick it off.

### Dilution & Dosage Guidelines

Always use Essential Oils diluted to .5% to 5% for topical use on animals according to the size, age and physical condition of your animal.

- Babies & Elderly - 0.5%:** 1 drop in 10ml carrier (3 drops per 1oz)
- Miniature (Up to 10 lbs) - 1%:** 2 drops in 10ml carrier (6 drops per 1oz)
- Small (11-25 lbs) - 2%:** 4 drops in 10ml carrier (12 drops per 1oz)
- Medium (26-40 lbs) - 3%:** 6 drops in 10ml carrier (18 drops per 1oz)
- Large (41-70 lbs) - 4%:** 8 drops in 10ml carrier (24 drops per 1oz)
- Extra-Large (70+ lbs) - 5%:** 10 drops in 10ml carrier (30 drops per 1oz)

For topical application, use the diluted product adhering to the dosage recommendations below. Check individual product datasheets for specific precautions, contraindications, or recommendations regarding pregnant, very young, or very elderly animals. Animals should respond within 1 to 3 days but can show improvement immediately. If there is no improvement in 7 days, discontinue use and re-evaluate.

#### Massage Dosage Guidelines for Dogs

- Miniature (Up to 10 lbs):** 1 to 2 drops massage blend
- Small (11-25 lbs):** 3 to 5 drops massage blend
- Medium (26-40 lbs):** 6 to 9 drops massage blend
- Large (41-70 lbs):** 10 to 15 drops massage blend
- Extra-Large (70+ lbs):** 16 to 20 drops massage blend

#### Horses and Large Animals

Follow instructions for medium to extra-large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

#### Smaller Animals

*Miniature horses and cows, goats, sheep, etc.*

Follow instructions for small to large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.
