product summary

Antibiotics are among the most frequently used pharmaceuticals, and are, unfortunately, excessively prescribed, especially to children. While antibiotics have saved millions of lives, they are not without side effects. They do not discriminate between harmful bacteria that make us sick and healthy bacteria needed to maintain our bodies.*

Toxbgone For Kids is a proprietary blend of essential oils that have been shown to assist and help support the body with detoxing following the use of prescription antibiotics in children ages 3 years and over.*

ingredient highlights

Thyme ct. linalool: One of the preferred oils for use with children and the elderly when a powerful infection fighter is needed; particularly with colds, coughs, flu, and respiratory infections. The ancient Greeks used it for nervous disorders and to disinfect the air to help prevent the spread of disease.

Dill Weed: Among the earliest and most widely recognized medicinal herbs. Known for its benefits to the digestive, respiratory, and endocrine systems, it is a wonderful stimulant and digestive aid for children

suggested use

- Ages 3 to 5 years, roll over kidney reflex points of feet once per day for 7 days following use of prescription antibiotics.*
- Ages 6 years and above, roll over the kidney area on back and kidney reflex points of feet twice per day for 7 days following use of prescription antibiotics.*
