

# Essential Health

## FOR ANIMALS

### Warming Joint (pain support)

**Ingredients:** *Marjoram, sweet; Black Pepper, Peppermint, Organic Ginger Root, Organic Rosemary ct. 1,8 cineole, Organic Sesame Seed, and Fractionated Coconut*

This blend was formulated for relief from chronic joint pain, arthritis, and hip dysplasia. Many aging animals suffer from arthritis and other forms of joint pain, some of which may be the result of past injuries. While these are common occurrences as animals age, poor breeding and excessive inbreeding in puppy mills have created many unfortunate and painful conditions suffered by very young dogs such as hip dysplasia, knee problems, and other spine and joint issues.

Animals that are in pain cannot always tell us of their pain until they become lame or show disability. This blend provides warmth and boost circulation to the areas allowing the body to experience much-needed pain relief.

### Animal Safety Guidelines

- Do not give Essential Oils to your animals internally.
- Animals will often lick the area where Essential Oils have been applied. This is normally not a problem when following recommended dilution and dosage guidelines, but you should watch for adverse reactions that may include skin irritation, vomiting, diarrhea, depression, lethargy, weakness, excessive drooling/salivation, or seizures. If they show signs, wipe the area with a cloth soaked with a carrier oil. If irritation continues or your animal's condition worsens, seek immediate veterinary assistance.
- Never apply Essential Oils directly to an animal's muzzle area, inside nostrils, inside ears or mouth, or directly to genital areas.
- Do not get Essential Oils near or in the eyes. If Essential Oils accidentally get into the eyes, apply a carrier oil such as Grape Seed to a cloth and wipe over the area.
- Do not apply Essential Oils neat (undiluted) to animals; they should always be diluted for topical application to animals.
- In a barn or kennel-type facility, it is best to store aromatherapy products in aroma-safe containers, locked away from children and animals. Be mindful of your fellow barn/stable/kennel mates and their animal friends; not everyone can tolerate the same aromas you and your animals may enjoy.
- Remember, less is best when it comes to Essential Oils. Do not be tempted to think that if it's good, more is better.
- Exercise caution with pregnant animals and use smaller dosages than you normally would. Avoid during first few weeks of pregnancy and do not use on puppies until after 10 weeks of age.

### Do Not Use Essential Oils With The Following:

- **Cats:** due to their highly sensitive metabolic systems.
- **Fish and Reptiles:** due to their pH levels and aquatic environment.
- **Birds:** due to their respiratory and metabolic systems.
- **Rodents & small mammals (gerbils, hamsters, rabbits, rats etc.):** there is not enough research on the use of Essential Oils with these animals to determine a safe use.

ESSENTIAL OILS

### Suggested Usage

**Massage:** Gently massage over the area of concern, following the recommended dosage for species and size. Use as needed, but do not exceed 2 weeks at a time.

You can apply a hot pack over the area when finished to provide further comfort. Always apply a thin towel between hot pack and skin to ensure you do not overheat the skin.

### Dilution & Dosage Guidelines

Always use Essential Oils diluted to .5% to 5% for topical use on animals according to the size, age and physical condition of your animal.

- Babies & Elderly - 0.5%:** 1 drop in 10ml carrier (3 drops per 1oz)
- Miniature (Up to 10 lbs) - 1%:** 2 drops in 10ml carrier (6 drops per 1oz)
- Small (11-25 lbs) - 2%:** 4 drops in 10ml carrier (12 drops per 1oz)
- Medium (26-40 lbs) - 3%:** 6 drops in 10ml carrier (18 drops per 1oz)
- Large (41-70 lbs) - 4%:** 8 drops in 10ml carrier (24 drops per 1oz)
- Extra-Large (70+ lbs) - 5%:** 10 drops in 10ml carrier (30 drops per 1oz)

For topical application, use the diluted product adhering to the dosage recommendations below. Check individual product datasheets for specific precautions, contraindications, or recommendations regarding pregnant, very young, or very elderly animals. Animals should respond within 1 to 3 days but can show improvement immediately. If there is no improvement in 7 days, discontinue use and re-evaluate.

### Massage Dosage Guidelines for Dogs

- Miniature (Up to 10 lbs):** 1 to 2 drops massage blend
- Small (11-25 lbs):** 3 to 5 drops massage blend
- Medium (26-40 lbs):** 6 to 9 drops massage blend
- Large (41-70 lbs):** 10 to 15 drops massage blend
- Extra-Large (70+ lbs):** 16 to 20 drops massage blend

### Horses and Large Animals

Follow instructions for medium to extra-large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.

### Smaller Animals

*Miniature horses and cows, goats, sheep, etc.*

Follow instructions for small to large dogs, beginning with less and working up to the larger sizes as you gauge the animal's response and tolerance.
