

# Clay & Tea Tree

deodorant 2.5oz

Sweating is a natural and necessary function of our bodies, and we all do it. Sweating helps control body temperature and assists in detoxifying the body, but when sweat comes in contact with bacteria on our skin body odor is the result.\*

Traditional chemical-laden deodorants often contain aluminum compounds that prevent the body from sweating and tend to block pores. But if we prevent our skin from sweating, bacteria can become trapped and cause even worse body odor. Natural deodorants, on the other hand, help keep the pores open allowing the skin to breathe, and also help kill the bacteria that causes the odor.\*

Our aluminum-free Clay & Tea Tree Deodorant is an incredibly effective, natural formula to nourish and deodorize the skin.\*

This gentle, natural deodorant features Kaolin Clay to absorb moisture and help balance the skin's pH levels combined with Tea Tree Oil for its incredible bacteria-fighting properties.\*

## ingredient highlights

**Kaolin Clay:** With an ability to absorb impurities from deep within the skin, Kaolin Clay can help restore and balance the skin's pH levels. It may also benefit skin issues like irritation, redness, and acne.\*

**Tea Tree:** With scientifically-proven antibacterial and antimicrobial properties, Tea Tree is an ideal alternative to commercial deodorants. It kills odor-causing bacteria quickly and naturally, and may reduce underarm pores. Tea Tree oil is also high in natural astringents that can help reduce perspiration.\*

**Grapeseed Oil:** Extracted from real grape seed, this oil has several important health benefits, and is a good source of essential fatty acids and vitamin E. It's packed with antioxidant benefits to nourish and moisturize skin.\*

**Tapioca Root Powder:** Well-known for absorbing moisture and neutralizing odor, tapioca root powder helps keep underarms dry without aluminum or artificial fragrances, and without clogging the pores.\*

**Castor Seed Oil:** This oil is rich in ricinoleic acid, a monounsaturated fatty acid known for its moisturizing properties and its ability to assist with skin inflammation.\*

## uses

- For external use only. Apply to underarms only; re-apply as needed throughout the day.\*
