

Myrrh & Sandalwood

deodorant 2.5oz

Sweating is a natural and essential bodily function that helps regulate temperature and eliminate toxins. While perspiration itself is odorless, the bacteria on our skin break down the sweat, leading to body odor. Many people seek solutions to manage this odor without resorting to harsh chemicals and synthetic fragrances found in conventional deodorants.*

Natural deodorants are formulated with ingredients derived from nature, which work in harmony with your body. Key ingredients like arrowroot powder and various clays absorb moisture and neutralize odor, while essential oils provide pleasant scents and additional antibacterial properties. For instance, ingredients such as myrrh and sandalwood essential oils not only impart a soothing aroma but also possess natural antimicrobial properties that help keep odor-causing bacteria at bay.*

Stay naturally fresh and confident all day with our Myrrh & Sandalwood Deodorant. This unique blend combines the purifying properties of clay with the warm, soothing scents of myrrh and sandalwood, offering effective odor protection and a touch of luxury.*

ingredient highlights

French Green Clay: A powerful ingredient in natural deodorants, known for its exceptional detoxifying and absorbent properties. Mined from ancient volcanic ash deposits in France, this mineral-rich clay effectively absorbs moisture and impurities, helping to keep you dry and fresh throughout the day. Its natural antibacterial qualities combat odor-causing bacteria, while its gentle nature makes it suitable for sensitive skin.*

Myrrh: A valuable addition to natural deodorants, celebrated for its antibacterial and anti-inflammatory properties. Extracted from the resin of the Commiphora tree, myrrh oil helps combat odor-causing bacteria, ensuring long-lasting freshness. Its soothing qualities make it ideal for sensitive skin, reducing irritation and promoting healing. Additionally, myrrh's warm, earthy aroma adds a rich, grounding scent to deodorant formulations, enhancing your daily routine with a touch of ancient wellness.*

Sandalwood: A prized ingredient in natural deodorants, Sandalwood is known for its soothing, anti-inflammatory properties and rich, woody aroma. This essential oil not only imparts a luxurious scent that lingers throughout the day but also offers antibacterial benefits, helping to combat odor-causing bacteria naturally. Its gentle nature makes it suitable for sensitive skin, ensuring a calm and irritation-free experience.*

Arrowroot Powder: A key ingredient in natural deodorants, prized for its ability to absorb moisture and keep you feeling fresh. Derived from the roots of the arrowroot plant, this fine, silky powder helps to naturally combat wetness without clogging pores, allowing your skin to breathe. Its gentle, non-irritating properties make it ideal for sensitive skin, while its effectiveness in maintaining dryness ensures you stay comfortable and confident all day.*

uses

- For external use only. Apply to underarms only; re-apply as needed throughout the day.*

Copaiba

copaifera officinalis 10ml

We all have cannabinoid receptors found in our brain, organs, tissues, glands, and immune cells. Two types of receptors, CB1 and CB2, are present in many tissues although each is linked to a different action within the body.*

Copaiba oil contains high levels of beta-caryophyllene (BCP), a cannabinoid that interacts directly with the CB2 receptors in our body and may be neuroprotective and have cardiovascular and immune benefits. Beta-caryophyllene is also found, in lower levels, in other essential oils like Black Pepper and Melissa.*

Indigenous tribes in South America have used copaiba in traditional medicine for centuries as a topical wound healer, to stop bleeding, and for skin sores and psoriasis. It has been used as a strong antiseptic and expectorant for the respiratory system, and as an anti-inflammatory and antiseptic for the urinary tract. It was an official drug in the *U.S. Pharmacopeia* from 1820 to 1910.*

The high levels of beta-caryophyllene and its uniquely sweet aromatic profile help Copaiba create a relaxing atmosphere when diffused or applied topically. Copaiba oil is used widely in cosmetic products including soaps, lotions, perfumes, and creams. It can be used following exercise or strenuous activity as a comforting cooldown. Combined with a neutral moisturizer, it makes a great addition to your daily skincare regimen to promote a clear, smooth complexion.*

When taken internally Copaiba is a powerful antioxidant supporting the health of our cardiovascular, respiratory, digestive, nervous, and immune systems.*

USES

aromatic

- **Diffusion:** Diffuse 3 drops up to 15 minutes per hour to create a warm, inviting atmosphere and to ease respiratory issues.*

bath

- **Bath:** Combine 1 drop of Copaiba, 1 drop of Peppermint, and 3 drops of Frankincense with ½ cup of Pink Himalayan or Dead Sea bath salts and add to warm water for a relaxing, rejuvenating bath.*

internal

- **Internal:** ASupport the cardiovascular, respiratory, nervous, immune, and digestive systems by adding 1-2 drops to water, juice, or tea, or encapsulating with a few drops of carrier oil.*

topical

- **Massage/Lotion:** Reduce the appearance of blemishes and promote clean, clear skin by adding to carrier oil or facial moisturizer.*
- **Massage:** Dilute one to two drops with a carrier oil, then apply to desired area for a relaxing massage, especially after workouts or strenuous physical activity.*

topical dilution guidelines

- **Healthy individuals ages 10 and over:** Dilute to 10% (60 drops per 1 ounce of carrier oil). A topical dilution of 25% (150 drops per 1 ounce of carrier oil) may be warranted in cases of severe pain, bad bruising, or serious muscle cramping.*

Fresh

bentonite clay tooth cleansing powder 2oz

Fresh mouth. Clean ingredients. Now you can have healthy, clean teeth and gums without artificial flavorings, artificial sweeteners, fluoride, carrageenan, triclosan, and sodium lauryl sulfate. Fresh Tooth Powder refreshes and cleans with powerful calcium bentonite clay, pink Himalayan salt, pure essential oils, and healing herbs.*

ingredient highlights

Bentonite Clay: Montmorillonite (Bentonite) Clay is a form of volcanic ash that is antibacterial and anti-inflammatory. It is a rich source of trace minerals like calcium, iron, copper, and zinc. When Bentonite Clay gets wet, it expands, changes its electrical charge to a negative charge, and becomes like a big sponge that can absorb toxins. It also has an alkalinizing effect that is beneficial for the health of teeth and gums.*

Pink Himalayan Salt: This all-natural salt is estimated to contain as many as 84 trace minerals that are naturally anti-inflammatory and antibacterial. Brushing with Pink Himalayan Salt can assist in removing bacteria from the teeth and gums, which helps in preventing the buildup of plaque and tartar.*

Peppermint Essential Oil: This tried-and-true remedy has been used all around the world for more than a thousand years. It kills bacteria and fungus, both of which can cause infections in the mouth or lead to the development of cavities. Peppermint oil is especially effective against anaerobic bacteria, which love a low-oxygen environment such as the spaces between teeth or below the gum line where cavities can form and thrive. Studies have shown that peppermint oil is more effective in reducing cavities than many of the active chemical ingredients used in commercial mouthwashes.*

Clove Essential Oil: Used in traditional Indian and Chinese medicine for centuries to relieve tooth pain, modern clinical research has indicated that clove oil can relieve tooth pain and bad breath, as well as help reduce gum disease. Clove oil also has the natural ability to restrict the development of bacteria and can help fight mouth and throat infections.*

Spearmint Essential Oil: An excellent antifungal and breath freshener. Studies show that using spearmint and/or peppermint oil for oral hygiene can help delay the process of gum disease and gingivitis. It is believed by some to have the ability to assist with toothaches as well.*

USES

- Wet toothbrush. Dip in powder and brush as you normally would. Rinse.*
